

## The Partners in the Alliance

ANGEL was founded in 1998 and is one of the top five environmental consulting companies in Brazil. ANGEL's focus is domestic and multinational petroleum clients and multinational industrial clients.

Antea™ Group is an international engineering and environmental consulting firm specializing in full-service solutions in the fields of environment, infrastructure, urban planning and water. By combining strategic thinking with technical expertise and pragmatic action, Antea Group serves clients ranging from global energy companies and manufacturers to national governments and local municipalities. A wholly-owned subsidiary of Oranjewoud N.V., Antea Group provides access to more than 3,000 skilled professionals in over 100 offices around the world and experience on 6 continents.

Established in 1990, BECO Group is a consultancy firm based in the Netherlands and Belgium with a team of more than 40 academically trained consultants with diverse backgrounds. BECO provides strategic development, implementation services and tools with a focus on: supply chain strategy, energy and climate, CSR annual reporting, Cradle to Cradle, internal and external stakeholder engagement, eco-design, Lifecycle Analysis, and sustainability purchasing policy. BECO's 'raison d'être' is that sustainability creates added value and profit for your company.

A Return on Sustainability - that is the promise on which BECO delivers.

Delta-Simons is a leading UK environmental consultancy, providing business-focused solutions to environmental problems across a diverse range of service areas. We work closely with our customers in the property, industrial, petroleum, service and public sectors from strategic level through to practical project delivery. From contaminated land, geotechnics, EH&S and energy to corporate responsibility, sustainability, carbon management, drilling, waste and ecology, with its expert knowledge and sound commercial understanding, Delta-Simons has become the first choice consultant for its customers across the UK and Ireland.

Headquartered in Vienna (Austria), denkstatt is one of the most-respected consulting organisations in the field of sustainable development in Central and Eastern Europe. A team of more than 60 experts in Austria, Bulgaria, Hungary, Romania, Slovakia, Spain and Serbia offer services including the introduction of management systems, operational and municipal waste management, assistance in the areas of climate protection and energy, consultation in the area of corporate responsibility and sustainable development, calculations in the field of product sustainability, as well as trainings and coaching. Our solutions, developed in close cooperation with our industrial and public sector clients, ensure that decisions taken today will meet tomorrow's challenges.

DGE Group was founded in 1985 in Denmark, providing consultancy to the mineral, oil and gas exploration sector but quickly expanded to provide additional environmental services. DGE Group's home market is Scandinavia with its expansion market in the Baltic Sea Region but also taking part in international projects.

DGE Group operates from Denmark, Sweden and Lithuania with approximately 85 consultants in 10 office locations. Its primary resource is its devoted and skilled employees in its core competence areas, including Corporate Environmental Protection, Environmental Real Estate Assessments and Engineering.

Environmental Centre IFPA (EC) is the premier HSE consultancy in Russia. The company has 15 years of successful project experience in dozens of regions in Russia and the Former Soviet Union, and offers a wide range of services throughout the project life cycle – from design through decommissioning. EC has developed significant expertise in the following industrial sectors: Energy (including nuclear); Mining and Minerals; Chemical and Pharmaceutical; Transportation and Communications; and Diversified Manufacturing.

EnviroSolutions & Consulting (ESC) is a leading Environment, Health, Safety and Risk consultancy in Asia. ESC combines an international outlook with local knowledge, for our business and government clients. Our offices are located in Singapore, Malaysia, Indonesia, Hong Kong and are part of a global network of over 120 country offices. Our thorough understanding of the local environment, regulations, policies and practices combined with a clear client focus enable the straightforward understanding of often opaque and unfamiliar regulatory structures. Whether evaluating innovative policies, delivering practical EHS solutions or assessing compliance or project impacts, we deliver

innovative services and offer technical expertise to identify and implement the most appropriate and applicable responses for the Asian environment.

ESD China Ltd. is a professional environment, energy and engineering service firm. Incorporated in China, it operates five offices in the country, in Shanghai, Beijing, Tianjin, Guangzhou and Wuhan, respectively. The firm is comprised of highly experienced scientists, professional engineers and management specialists from Europe, North America and China. ESD China Ltd's clientele includes leading multinational companies, international financial institutions and private equity funds operating in China and Southeast Asia as well as major Chinese corporations and Chinese governments.

Its quality management system is ISO9001 certified. Through the past decade, ESD China Ltd. has provided clients with quality services in energy and industrial engineering, water resources and sustainable municipal development, environmental, health and safety management of industrial facilities, and environmental site assessment and contaminated land remediation.

At FIRA we validate sustainability claims made by companies and review their internal processes. FIRA leads the way in linking the supply and demand of Corporate Social Responsibility (CSR), and in doing so we create tangible and durable shared value.

We tap into information on sustainability that is used by businesses to make strategic decisions and fulfill their ambitions. By carrying out thorough and independent assessments of sustainability-related information, businesses can confidently communicate to their stakeholders that their sustainability strategy and performance are credible.

Geolingenieria provides a full range of environmental, engineering, health, safety, and social consultancy services to petroleum and mining companies and has successfully completed projects in Colombia, Peru, Venezuela, and Dominican Republic for more than 20 years. Headquartered in Bogota, Geolingenieria has a highly qualified multidisciplinary team of over 200 professionals.

The primary focus is conducting environmental impact assessments and providing civil and geotechnical engineering services to the Oil & Gas Industry. The scope of Geolingenieria services span from the civil design of exploration facilities to the performance oversight of already in place petroleum production fields. This includes geotechnical and environmental studies, licensing and permitting, conception and development of management programs, and project supervision.

For more than 60 years, HPC has been offering interdisciplinary geological and engineering services in the fields of redevelopment, site recycling, infrastructure planning as well as environmental consulting for private and public clients. With a network of 27 offices in Germany, and a further 10 offices in Europe (Austria, Spain, France, Greece, Poland and Bulgaria) HPC guarantees its clients individual and customised consulting services.

A total of 360 professional staff generates a total annual turnover of 36 million Euro. The company's reference list demonstrates competence, responsibility and confidence for the chemical and petroleum industries, mechanical engineering, energy, automotive, electric and construction industries, water supply, nature protection, transportation and administrative bodies.

Based in Europe in the Netherlands, Oranjewoud, a member of Antea Group, is one of this region's largest suppliers of EHS services. Oranjewoud provides high-quality engineering and consultancy services. The organization is a provider of services across a wide-ranging field covering infrastructure, urban development, construction, nature and landscape, environment and safety, property, and sports & leisure. Oranjewoud takes care of the whole process, from preliminary studies, consultancy, design, planning and organization, right up to realization, management and operation. The company was founded in 1951 and has 2,700 employees. Oranjewoud provides services to both the public sector (ministries, provinces and municipalities), and private industry serving both local and international clients.

Peter J Ramsay & Associates Pty Ltd, established in 1988, is a firm of committed environmental professionals providing innovative and sustainable solutions to environmental challenges. Managing corporate environmental risks, sustainable development and transition to a carbon constrained economy are key practice areas for PJRA's multidisciplinary engineers and scientists.
