

Geotechnical Consulting

What's it like down there?

What's it like down there?

Sand?

Loam?

Maybe oil?

No – not in the Black Forest.

## Project References

### [Haarmann & Reimer](#)

The manufacturing plants of Haarmann & Reimer, a producer of fragrances and essences in Nördlingen, are bursting at the seams. Building something new and moving seems imminent. Then in 1995 the decision is taken: to move the whole site to an industrial area in the southeast of the city. On an area of more than 3 hectares ...

### Service Information

#### Tasks:

- Foundation consulting
- Constructive earthworks and foundation engineering
- Self and external monitoring
- Examination of building material

#### Our services:

- Determination of geological subsoil conditions
- Mechanical soil testing in the laboratory and in the field
- Suitability test
- Geophysical investigations
- Foundation consulting
- Earth and foundation statics
- Water retention and seepage concepts
- Construction supervision/management

#### Your benefit:

- Technical and cost-related limitation of the subsoil risk by services from a single contractor
- Economic construction
- Reliable assessment of the subsoil risk

Our Experts

**Bernhard Kunz**
