

# Assessment of financial reserves for inherited pollution in opening balance at German Rail (DB AG)

## Project description:

The value of financial reserves for inherited pollution needed to be assessed at 01.01.1994- for the opening balance DB AG. Due to the numerous large properties, only a classification based on random inspections could be considered. The project was undertaken in partnership with KPMG.

## Services:

- Typification of risk classes
- Typification of plant
- Risk assessment of the individual plant types
- Exploration of inherited pollution on basis of random samples
- Financial assessment of the damage caused by individual plant types
- Extrapolation to the operationally necessary plant and properties of DB AG

## Customer benefits:

- Experience with all suspected plant types with inherited pollution
- Wide presence in Germany
- Competent cooperation with the commissioned auditor KPMG

## Project name:

Opening balance DB AG

## Country:

Germany

## Location:

Frankfurt

## Customer:

Deutsche Bundesbahn (German Rail)

## Reason:

Opening balance of DB AG

## Contract value:

500,000 €

## Project duration:

09/93 – 12/93
