

Oiltanking Tank Farm at Hanau

Project Description:

Take-over of the tank farm by Oiltanking GmbH in 2000. There exists soil and groundwater contamination caused by the previous owners. Since 1998, remediation works have been carried out by means of soil-gas extraction and groundwater recovery. Supervision and consulting by HPC, since 2001 as general contractor at a fixed price.

HPC Performance:

- Complete investigation of the tank farm in the context of a property transfer.
- Acceptance of the responsibility for remediation fixed by an agreement under public law
- Coordination with authorities
- Operation of remediation facilities
- Reporting

Client Benefit:

- Reliability with regard to cost
- Acceptance of the responsibility for remediation
- Available management capacities for the previous owner
- Release of the new owner
