## Project description:
- Analysis and assessment of sites for a potential development by investors with respect to environment, geotechnics, hydrogeology, topography, infrastructure, surroundings and natural hazards
- Identification, assessment and quantification of investment risks
- Analysis and assessment of the country-specific approval situation (environment)

## Further project data:
- Two 200 ha to 400 ha properties

## Purpose:
- Site selection assessment for a planned industrial plant

## Our services:
- Site analysis based on a client-specific assessment criterion catalogue
- Design and adaption of assessment criterion catalogue and investigation program
- International cooperation with Inogen Alliance-Partner ESD China Ltd.
- Comprehensive technical site investigation (topographical survey, geotechnical, hydrogeology, environmental)
- Analysis of the surroundings of the site (audits)
- Recommendations regarding the identified risks
- Conduction of criteria for site preparation measures
- Cost estimate for site preparation efforts and related time planning
- Support for the definition of technical criterions of the settling contract
- Visualization, geo-modeling and animation

## Client benefits:
- Comprehensive decision base for the site selection
- Knowledge of potential risks prior to signing of contract
- Relevant site information and technical background for drafting of the contract
- Reliable cost calculations for site preparation efforts
