

FADO – Technical Documents online, Karlsruhe, Germany

LUBW State Institute for the Environment, Measurement and Nature Conservation

Service area	Contract value	Project duration
Environmental Consulting, Information Systems	ca. €90,000	1996 - 2012

Our services:

- Content and technical preparation of content and data
- Structuring of contents
- Editorial work
- Migration of data to a CMS

Project description:

- Internet portal FADO (Technical documents online): published documents in well-arranged subject areas, in the form of a digital library
- Both professional users and layman have a quick overview and efficient access to the existing range of information supply
- Necessary technical system frame (hypertext format) for the subject system was developed by the Institute of Technology (KIT) and the Fraunhofer Institute
- KIT built on a content management system in which the documents are administered
- HPC contract: include content, structure and implementation of information access
